

Clean Water

VS

Unsafe Water

CLEAN WATER

- PREVENTS DISEASE:
 - CLEAN WATER DRAMATICALLY REDUCES THE RISK OF WATERBORNE ILLNESSES SUCH AS CHOLERA, TYPHOID, AND DYSENTERY, WHICH ARE CAUSED BY PATHOGENS IN CONTAMINATED WATER.
- PREVENTS DISEASE:
 - CLEAN WATER DRAMATICALLY REDUCES THE RISK OF WATERBORNE ILLNESSES SUCH AS CHOLERA, TYPHOID, AND DYSENTERY, WHICH ARE CAUSED BY PATHOGENS IN CONTAMINATED WATER.
- BOOSTS IMMUNE HEALTH:
 - BY FLUSHING TOXINS AND SUPPORTING ORGAN FUNCTION, CLEAN WATER HELPS THE IMMUNE SYSTEM FUNCTION OPTIMALLY AND PROTECTS AGAINST INFECTIONS.
- IMPROVES SKIN AND KIDNEY HEALTH:
 - STAYING HYDRATED WITH CLEAN WATER PROMOTES HEALTHY, GLOWING SKIN AND SUPPORTS KIDNEY FUNCTION BY HELPING TO FILTER WASTE AND PREVENT STONES AND INFECTIONS.

UNSAFE WATER

- INFECTIOUS DISEASES:

EXPOSURE TO PATHOGENS IN WATER CAUSES DIARRHEAL DISEASES, CHOLERA, DYSENTERY, TYPHOID, AND POLIO, WHICH ARE A MAJOR CAUSE OF ILLNESS AND DEATH, ESPECIALLY IN YOUNG CHILDREN.

- CHEMICAL EXPOSURE:

DRINKING CONTAMINATED WATER CAN EXPOSE INDIVIDUALS TO CHEMICALS SUCH AS HEAVY METALS, PESTICIDES, AND OTHER INDUSTRIAL POLLUTANTS. THIS CAN LEAD TO:

1. CHRONIC DISEASES: CANCERS (SUCH AS BLADDER, KIDNEY, AND LUNG CANCER), NERVOUS SYSTEM DAMAGE, AND REPRODUCTIVE OR DEVELOPMENTAL PROBLEMS.
2. ACUTE ILLNESSES: KIDNEY DAMAGE, SKIN DISCOLORATION, AND ORGAN DAMAGE FROM HIGH DOSES OF CHEMICALS.

- RESPIRATORY PROBLEMS:

INHALING CHEMICALS THAT EVAPORATE FROM POLLUTED WATER CAN CAUSE RESPIRATORY IRRITATION AND WORSEN CONDITIONS LIKE ASTHMA.
