

When I Wash My Hands: A Learning Activity

MizuTeku

Let's Start!

In this activity, you will learn about washing your hands. You will learn the steps to wash them well. You will also learn why it is important to wash your hands to stay healthy.

Here are some words you will learn about:

- **Germ**s: Tiny things that can make you sick. Germs can get on your hands when you touch things. Washing your hands helps to get rid of germs.
 - Example: Germs can spread when you don't wash your hands after using the toilet.
- **Soap**: Something you use with water to clean your hands. Soap helps to trap and wash away germs.
 - Example: Soap can smell good and make bubbles when you wash your hands.
- **Water**: You need water to wash your hands. Water helps to rinse away the soap and germs.
 - Example: Water can be warm or cold when you wash your hands.

Tips for This Activity

Take your time and think about each question. Read the words carefully and do your best. Have fun!

A. List the Steps

Write down the steps to wash your hands. Use simple words to tell what you do.

Step	Description
1	Wet your hands with water.
a.)	<i>What is the first step?</i>
b.)
